

Beaute'
MEDICAL AESTHETICS

Welcome to *Beauté* Medical Aesthetics!

At *Beauté* Medical Aesthetics, you should feel and look your best. Our main goal is to help you unlock your natural beauty, so we offer a wide range of aesthetic and wellness treatments to *restore, enhance, and elevate it*. Our innovative and modern treatments and devices deliver the most effective results with minimal downtime for results you can see and feel fast. From laser skin therapies and injectables to PRP, we believe in a holistic approach to beauty and wellness. Everyone's needs are different, and our medical team is here to help you find the ideal treatment plan specifically for you.

Beauté Medical Aesthetics is based in Peachtree City, GA, and offers aesthetic services, including body contouring, weight loss treatments, skin-rejuvenating fillers and injectables, wrinkle-preventing treatments, and wellness interventions. We also provide our own plant-based and medical-grade skincare products, which can be used to enhance aesthetic procedures or as stand-alone treatments.

Our commitment to providing the most innovative aesthetic procedures allows you to meet all your beauty and aesthetic needs with the highest professionalism and expertise. Our team of medical professionals has years of experience and a commitment to staying up-to-date on the latest trends and state-of-the-art equipment to the latest skincare products.

Visit us at *Beauté* Medical Aesthetics and take advantage of our luxury experience, expert medical providers, and personalized approach. Our team of certified medical professionals is dedicated to providing top-of-the-line aesthetic treatments and services to help you look and feel your best. We understand everyone is unique, so we offer consultations to customize each experience to your needs.

Our Founder, *Kalato Holts*

Kalato Holts, the founder of *Beauté* Medical Aesthetics, is a double board-certified nurse practitioner in Family and Aesthetics. She has 28 years of medical and aesthetic experience. While working in family medicine, she discovered her passion: aesthetics. Her love for aesthetics and beauty started from her own experiences.

Kalato returned to school to specialize in aesthetics and has practiced it for over 20 years. She truly understands and believes in beauty from the inside out, helping her patients reach their health and aesthetic goals.

About Our Treatments

Every aesthetic, wellness, and body treatment at *Beauté Medical Aesthetics* is deeply rooted in science, bolstered by modern-day technology, and in high demand. We work hard to bring you the most cutting-edge treatments with results you can see and feel. Plus, every treatment we offer can be tailored to meet your beauty needs and goals for optimal results.

Face

From advanced peels to microneedling and even treatments that tackle discoloration, fine lines, and wrinkles, we offer the most comprehensive menu of services to have the best skin possible while looking natural and youthful.

Hydrafacials

When it comes to skincare treatments, facials have been a popular choice for many years. However, the most advanced technology available today is HydraFacial, a hybrid facial treatment. Unlike a traditional facial that uses manual exfoliation, harsh chemicals, and abrasive techniques to exfoliate the skin, HydraFacial relies on gentle suction and vortex technology to cleanse and hydrate the skin deeply. The treatment incorporates several steps, including cleansing, exfoliating, and extracting impurities and dead skin cells while infusing vital nutrients such as hyaluronic acid into the skin.

Hydrafacials can be used on various areas, including the face, scalp, lips, eyes, and even the body.

Starting at \$175

SkinPen Microneedling

If you want to improve your skin's texture, appearance, and health, SkinPen Microneedling may be just what you need. This innovative technique helps clients achieve smoother, brighter, and more youthful-looking skin. It uses fine, sterile needles to create tiny channels on the skin's surface, which prompts the body's natural healing response and stimulates the production of collagen and elastin fibers for healthy, firmer-looking skin.

SkinPen Microneedling treatments can address acne scars, fine lines, wrinkles, enlarged pores, and uneven texture or tone. Each session provides gradual but noticeable improvements in the appearance of the skin.

Starting at \$300

Platelet-Rich Plasma (PRP)

PRP is quickly becoming the go-to solution for rejuvenating the skin and fighting the effects of thinning hair. PRP involves extracting a small amount of blood from the patient, then processing it through a centrifuge to isolate platelets containing high concentrations of essential growth factors to stimulate collagen production. As a result, there is a reduction in wrinkles, increased elasticity, improved texture, and better hair growth without invasive surgery or harmful chemicals.

PRP treatments offer long-lasting results compared to other beauty treatments like Botox injections or chemical peels. In addition, the results are obtained with little-to-no downtime.

NuEra Skin Tightening

It's normal for the skin to lose its firm, taut appearance with age, leading to dark circles under the eyes. If loose, saggy skin is bothersome to you, NuEra Skin Tightening can help reinstate tight, youthful skin for a refreshed appearance. NuEra Skin Tightening uses non-invasive radiofrequency energy to heat the dermis and stimulate collagen production, rejuvenating and tightening the skin. The treatment is comfortable (some say it feels like a warm stone massage) with no downtime so that you can continue your daily routine after treatment.

NuEra Skin Tightening also delivers results with just one session! Those looking for a quick-fix beauty treatment often opts for this treatment for radiant-looking and tighter skin.

SmoothGlo Skin Rejuvenation

Are you looking to revive your skin's youthful glow and erase signs of aging without undergoing invasive treatments? Look no further than SmoothGlo Skin Rejuvenation, a revolutionary treatment that combines the power of the Stellar M22 IPL (Intense Pulsed Light) with LegendPro RF microneedling to deliver unparalleled results.

Using light energy, Stellar M22 IPL is a safe and non-invasive way to target fine lines, wrinkles, sun damage, age spots, rosacea, and other skin issues. The LegendPro RF Microneedling device creates tiny micro-channels with ultra-thin needles that stimulate collagen production deep within the skin. This combination technology enhances cell renewal while improving skin texture, reducing pore size and the look of fine lines and wrinkles, and tightening sagging areas for better definition.

The technology used in SmoothGlo treatment gently exfoliates dead skin cells while stimulating new cell growth, creating a brighter-looking, younger-looking, healthier-looking complexion without the negative impact caused by harsh chemical agents.

Laser Skin Resurfacing

Laser skin resurfacing is a revolutionary cosmetic treatment that treats a range of concerns and improves the appearance of the skin. The laser penetrates deep into the dermis to stimulate collagen production, reduce fine lines and wrinkles, minimize pores, and smooth out uneven texture. This procedure can also target pigmentation issues caused by sun damage or acne scars.

At *Beauté* Medical Aesthetics, we offer the M22 Stellar Skin Resurfacing treatment and ResurFX for unparalleled results.

M22 Stellar Skin Resurfacing merges Intense Pulsed Light (IPL) with fractional ablative laser resurfacing for a comprehensive approach that offers superior outcomes and minimizes downtime. Laser resurfacing is the optimal treatment for radiant, youthful-looking skin with long-lasting results.

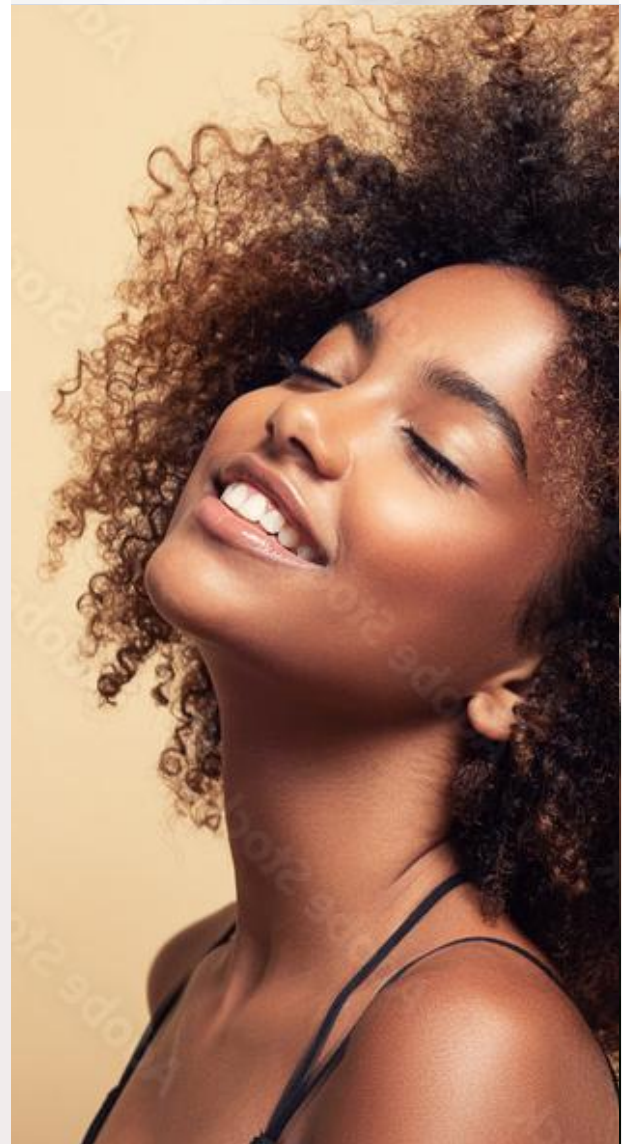

ResurFX is a non-invasive, highly effective laser treatment that uses innovative technology to resurface the skin and stimulate collagen production to correct sun damage, wrinkles, fine lines, age spots, and other signs of aging. In addition, resurfacing your skin with ResurFX involves minimal downtime.

LegendPRO RF Microneedling

LegendPro RF Microneedling is an advanced aesthetic treatment offered at Beautè Medical Aesthetics. The cutting-edge skincare technology, which can be used with PRP as an add-on option, harnesses the power of radiofrequency and microneedling to rejuvenate the skin from within and improve fine lines, wrinkles, acne scars, and more without surgery.

The LegendPro RF Microneedling is a powerful, non-invasive skincare treatment that can rejuvenate your skin to reduce the signs of aging. The technology utilizes radiofrequency (RF) energy and microneedles to stimulate collagen production deep within your skin's layers. During a session, tiny needles are inserted into your skin with a handheld device, which creates microchannels, allowing the RF energy to penetrate deeply into the dermis to stimulate collagen production. Over time, this boost in collagen leads to firmer, smoother-looking skin. In addition to its anti-aging benefits, LegendPro RF Microneedling effectively reduces acne scars and evens out uneven pigmentation.

VI Peel

Chemical peels are a tried and true treatment that uses acids to improve the appearance and health of your skin by removing dead skin cells and promoting cell turnover, revealing a fresher and younger-looking skin. One popular chemical peel is the VI Peel, which combines trichloroacetic acid (TCA), Retin-A, salicylic acid, phenol, and vitamin C. This unique formula allows for optimum effectiveness without downtime or discomfort during application. The VI Peel evens skin texture and tone while targeting hyperpigmentation, acne scarring, and fine lines and wrinkles resulting in glowing, radiant, youthful-looking, rejuvenated skin.

Body

From erasing unwanted tattoos to getting the tight, toned muscles of your dreams, Beautè Medical Aesthetics offers many body treatments to help you achieve your aesthetic goals.

Laser Tattoo Removal

Tattoos can be a form of self-expression, but what happens when you regret the decision? Technological advancements have made tattoo removal more accessible and efficient than ever.

Non-invasive laser tattoo removal uses a high-powered laser to break down ink particles in your skin, allowing the body's natural processes to flush them away. At *Beautè Medical Aesthetics*, we use the PiQo4 system, which combines four different wavelengths of light, making it suitable for removing all types of tattoos regardless of color or complexity. The PiQo4 emits short pulses of high-energy light that penetrate deep into the skin tissue without causing damage to the surrounding skin tissues or leaving scars. This makes the treatment ideal for people who want a safe and effective option for permanently removing unwanted tattoos.

Emsculpt

Suppose you want to sculpt your body without spending endless hours at the gym and following diets that don't deliver results, look no further than Emsculpt. This non-invasive body contouring technology eliminates stubborn fat and tones muscles with little-to-no downtime or discomfort.

Emsculpt uses high-intensity focused electromagnetic energy (HIFEM) to produce muscle contractions, resulting in increased strength and definition far more effective than traditional workout methods. Emsculpt can target the abdomen, buttocks, arms, thighs, and calves. Each 30-minute session is downtime-free, and many patients see results after one or two treatments, with optimal results expected after four sessions. Emsculpt is an excellent option for enhancing your physique without undergoing surgery.

Emsculpt NEO

The latest release from the creators of Emsculpt is Emsculpt NEO, a treatment that will help you achieve your desired body shape. This body contouring treatment takes things to the next level by incorporating radiofrequency technology to target fat cells. So, if you're looking to sculpt your muscles and reduce stubborn pockets of fat, Emsculpt NEO may be the way to go. Emsculpt NEO uses high-intensity electromagnetic energy to stimulate muscles, resulting in an increase in muscle mass and the strengthening of existing muscles. It targets fat reduction and muscle building, making it a game-changing treatment. The Emsculpt machine emits electromagnetic pulses that cause intense muscle contractions, equivalent to thousands of sit-ups or squats per minute. These contractions build up lactic acid within your muscles, which triggers the release of fatty acids (adipose tissue) from your cells. Its effectiveness has been proven through clinical studies showing remarkable results when used regularly.

Splendor x Laser Hair Removal

If you want to get rid of hair in certain areas yet are tired of constantly shaving, waxing, tweezing, and plucking, consider Splendor X Laser Hair Removal.

This innovative hair removal treatment utilizes cutting-edge laser technology to reduce unwanted hair on different body parts permanently. Splendor X Laser Hair Removal uses two types of lasers, Alexandrite and Nd: YAG, which safely target and destroy the hair follicle without causing damage to the surrounding skin. Powerful pulses of light energy are directed into the targeted area, which heats up and damages the melanin in the hair root to shut down the follicles' ability to produce new hairs. Over time, hair is permanently reduced, leaving the skin smooth and fuzz-free.

Injectables

Injectables and dermal fillers are the modern-age way to restore volume to the face while defining the features for a holistically younger look. So whether you want fuller lips or more defined cheekbones, dermal fillers, and injectables are just what you need for that added boost of confidence in your appearance.

Dermal Fillers

Dermal fillers are substances injected into the skin to smooth out fine lines and wrinkles and improve sagging areas by adding volume and structure. One significant advantage of dermal fillers is that they offer immediate results with minimal downtime or discomfort. In addition, the procedure is relatively painless and takes 15–30 minutes per session, depending on the number of areas treated.

At Beautè Medical Aesthetics, we offer a variety of dermal filler treatments tailored to your needs so you can look and feel your best, including Juvéderm, Restylane, Radiesse, Versa, and Sculptra to treat the chin, jawline, neck, décolletage and the face as a whole. We also offer different body fillers to treat areas in the hands, feet, and buttocks. Our team will work with you during your consultation to determine the type best suits your individualized aesthetic goals.

Botox

To stop wrinkles dead in their tracks, Botox is the go-to solution. The cosmetic treatment injects a form of botulinum toxin into specific facial muscles to paralyze them temporarily so they cannot contract, limiting the look of wrinkles and fine lines caused by repeated muscle movements. The results of Botox injections typically last 3–6 months.

Routine Botox injections create smoother skin where wrinkles previously existed. Botox can also prevent new lines from forming over time when treated proactively. At *Beautè Medical Aesthetics*, we offer customized treatments based on each individual's goals and unique anatomy to achieve natural-looking results while enhancing their natural beauty.

Wellness

A wide array of wellness-focused treatments and services are available at Beautè Medical Aesthetics to compliment your aesthetic treatments for a holistic approach to looking and feeling your ultimate best.

IV Hydration

IV hydration does the trick if you're tired, dehydrated, sluggish, or need an energy boost. This revolutionary treatment helps our clients replenish their body's vital nutrients and hydration levels quickly and effectively.

IV hydration works by administering a solution of water, electrolytes, vitamins, and minerals directly into the bloodstream through an intravenous (IV) line. This allows for faster absorption of essential nutrients than oral consumption, bypassing the digestive system's processes. The infusion immediately relieves dehydration-related symptoms such as fatigue, weakness, headache, or nausea. It also boosts energy levels instantly and enhances overall physical performance with added hydration to the body's cells. In addition, IV treatments can increase collagen production in the skin resulting in improved texture and reducing signs of aging, giving clients a glowy appearance after their session.

IV hydration we offer at *Beautè Medical Aesthetics* includes Meyer's Cocktail, iron infusion, ketamine infusion, NAD+ infusion, and glutathione infusion.

The O-Shot

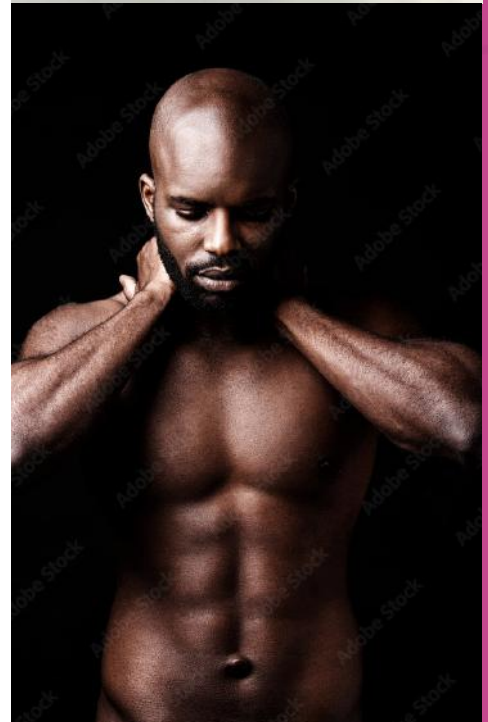

The O-Shot is a cutting-edge procedure that can help improve sexual wellness and function in women. Using a patient's blood spun down in a centrifuge, PRP is taken from the blood and injected into the woman's clitoris, labia majora, and vaginal wall. These injections help increase the sensitivity and pleasure of sexual intercourse. It also increases lubrication in the area.

The PRP O-Shot also helps to promote new tissue growth and improve blood flow to the area, which aids in reducing pain during sexual intercourse and improving urinary incontinence. The PRP O-Shot is a quick and painless procedure with no downtime and minimal risks, and most women experience positive results almost immediately. The effects can last anywhere from 6 months to two years.

The P-Shot

The P-Shot is a treatment that uses PRP to treat erectile dysfunction (ED) in men. This innovative therapy injects your platelets and plasma into the penis to improve blood flow, sensitivity, and penile rigidity. PRP is stimulated with high-frequency vibration to promote healing and increased blood circulation to the penis.

The P-Shot helps to improve the quality and firmness of your erections and can even help to increase penis size. In addition, it can be used to treat Peyronie's disease and improve sexual pleasure. Most men report a dramatic improvement in erections after just one treatment, and the results can last up to 18 months.

Weight Loss Treatments

If losing weight is an uphill battle, consider investing in one of our innovative treatments.

We offer the most cutting-edge weight loss solutions, including Mounjaro, a popular ingredient in weight loss supplements, and Ozempic, an FDA-approved medication that effectively reduces weight. It regulates appetite and increases feelings of fullness when injected under the skin. We also offer Saxenda, a groundbreaking FDA-approved weight loss medication that contains liraglutide, which controls appetite and reduces food cravings to aid in weight loss. There's also Wegovy, another FDA-approved semaglutide weight loss medication that helps decrease your appetite and makes you feel fuller for extended periods, leading to a natural reduction in caloric intake, and lipotropic injections to lose weight quickly and effectively.

Hyperbaric Oxygen Therapy (HBOT)

Hyperbaric oxygen therapy has gained popularity as a non-invasive treatment that involves breathing pure oxygen inside a pressurized chamber, aiding in increasing blood circulation and oxygen delivery to all body parts. HBOT allows more oxygen to dissolve into the bloodstream, then be delivered to all body parts. This process enhances cellular repair and regeneration, reduces inflammation, and promotes healing. Increased collagen production from HBOT could lead to firmer skin with fewer wrinkles.

While hyperbaric oxygen therapy can offer many benefits for various conditions and concerns, most recognized for its ability to enhance healing, improve skin health, reduce inflammation and pain, support mental functionality, and boost immune function.

BHRT Hormone Therapy

BHRT is a hormone replacement therapy that uses bioidentical hormones to restore hormonal balance and treat various conditions related to hormonal imbalance, including menopause, perimenopause, and andropause (the male equivalent). This revolutionary technique involves administering compounded bioidentical hormones to balance hormones in the female body optimally. Unlike conventional hormone replacement therapy, BHRT uses natural plant extracts that replicate human hormones' chemical structure and function, minimizing user side effects. BHRT can also alleviate symptoms such as hot flashes, night sweats, mood swings, fatigue, low libido, and memory loss.

The treatment involves customizing individualized dosages of bioidentical hormones based on each patient's unique needs and medical history. At *Beauté Medical Aesthetics*, we strive for overall wellness from within; through BHRT Hormone Therapy, we aim for services catered specifically for your health journey so that you look terrific inside and out! Both men and women can benefit from BHRT.

Testimonials: What our Patients Say About US

SEE WHY SO MANY
CHOOSE *BEAUTÈ*
MEDICAL AESTHETICS.

Layla M.

"I really loved going to this place—very clean and knowledgeable practitioner. Enjoyed my IV and feel so much better."

Tanya G.

"Wonderful and welcoming staff members. Dr. Holts is thorough and explains everything as it relates to your procedure. The office is inviting and clean. I recommend you go there for all your aesthetic needs."

Arian C.

"I love love love coming here! The staff is always so friendly and absolutely makes me feel welcome and at ease! They always listen to my needs and give me options for the best services!! Thank y'all so much! Can't wait to see all of you next week!"

Franklyn Z.

"Nice office, the staff was really professional and educative. I will be coming back for more, and I will be recommending this place to all my friends and family."
